

A letter from the founder

Dear Friends,

People always ask why I dedicated so many years to developing this product.

I'm a civil engineer and saw a common problem in people's homes – a long wait for the water to get hot. With some investigation, I was startled to find that the water going down the drain was the equivalent of 42,000 one-liter bottles of water every year!

That's what compelled me to look for solutions!

With some research, I found the existing solutions created more problems than they solved. There were timers that would bring you hot water quickly, but at the expense of higher gas bills. There were also pumps underneath a sink, but that solution required an electrical outlet under the sink and only provided a solution to one part of the house.

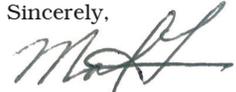

So I went on a quest to find a better solution and I did. Our product is very easy to install, works for all the hot water sources in your house, and takes up very little space near your hot water heater.

I'm very proud that I was able to find an effective solution at a reasonable price. I know you'll be happy with the result.

Call today to purchase your system and you'll be getting hot water in 10 seconds or less.

Here's to faster hot water!

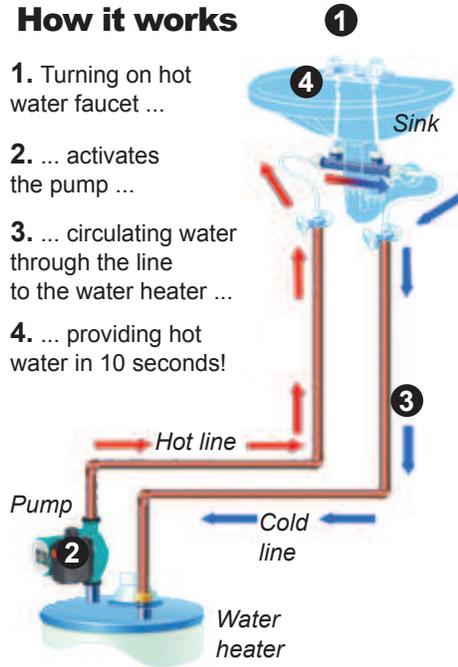

Sincerely,

Mark Franklin
Founder, FasterHotWater.com

How it works

1. Turning on hot water faucet ...
2. ... activates the pump ...
3. ... circulating water through the line to the water heater ...
4. ... providing hot water in 10 seconds!

Still Waiting for Hot Water?

We can save you

- ✓ Money
- ✓ Time
- ✓ Water

FASTERHotWater.com

Each year ...
 ... water going down the drain
 in your home adds up to:

- 💧 42,000 one-liter bottles
of water
- 🕒 80 hours of waiting
- 💰 \$240

Frequently Asked Questions

Q: How do I know if your product will benefit me?

If it takes 45 seconds or more for your water to get hot, this system will save you water, time and money.

Q: I have a tankless water heater. Will this product work for me?

Yes, we have systems that are effective with both tankless and traditional tank-style water heaters.

Q: Will this take up space under any of my sinks?

No, this is very small and is installed near the water heater and quickly brings hot water to all of your sinks and showers.

Q: Is there a warranty on this product?

Yes. A full five year warranty.

Water saved ...

... with the FasterHotWater system would fill more than 42,000 one-liter bottles of water throughout the year!
